

# CMPRO Change Notice

## New Iconography Expanding to Classic Screens (Social Media Links also Available)

### OVERVIEW

Professional Systems Associates, Inc. (PSA) recently released a Change Notice (CHG2017005) and Announcement (ANCMT2017002) describing renovations taking place to the CMPRO User Interface (UI). Part of this enhancement includes the transition to a new set of icons throughout CMPRO, which is now extending to the “classic” or “traditional” screens\*. Also included in this enhancement is the addition of PSA’s social media links on the **About CMPRO** menu.

\*Note: “classic” or “traditional” in this context means “prior to the CMPRO Desktop interface.”

### DETAILS

#### Icons

Screen captures provided further down are examples of what users can expect as part of their experience when working with CMPRO’s traditional screens. The look and feel may be different, but the functionality remains unchanged. As always, hovering over a given icon will display descriptive text about that icon.

#### About CMPRO & Social Media Links

To provide quicker access to the **About CMPRO** menu item, the link has been moved from within the Navigator menu to the Navigator Bar. Links to social network sites where PSA maintains a presence are now located within the **About CMPRO** menu. The links will open to the PSA page on the respective social media site. These social network sites serve as a way for CMPRO users to connect with one another and at times, provide exclusive information and content. PSA’s social content can range from company news, product announcements, CMPRO training opportunities, instructional training videos, and other online training content.

### AVAILABILITY

The changes described herein will be available with the release of C-BN-0116.
