

CMPRO Change Notice

New Links on Val. Program Detail Screen

Overview

New functionality on the *Valid Program Detail* screen allows a user to change the program's abbreviation and name.

Details

Users with appropriate permissions now have the ability to change the abbreviation and name of a Valid Program via the **Change Program Abbreviation** and **Change Program Name** links respectively, located in the left pane of the *Valid Program Detail* screen. Changes to either will be reflected throughout CMPRO, to include all systems and records associated to the program.

Change Program Abbreviation

Select the **Change Program Abbreviation** link in the **Options** section on the *Valid Program Detail* screen. The **Change Program Abbreviation** dialog box will display, where the user can change the program abbreviation.

Change Program Name

Select the **Change Program Name** link in the **Options** section on the *Valid Program Detail* screen. The **Change Program Name** dialog box will display, where the user can change the program name.

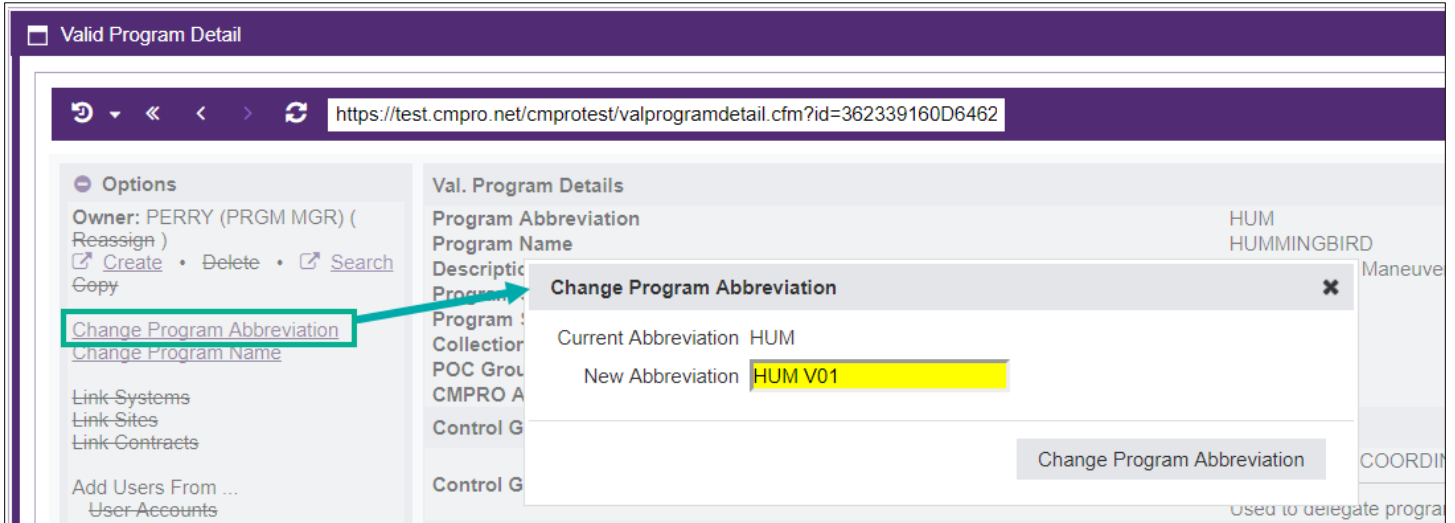

Availability

The changes described herein will be available with the release of C-BN-0117.
